- Creativity
- Time Management
- Team Work

TECHNICAL SKILLS

- Advanced in C, Java
- Basics in Python
- MERN Stack
- Linux
- Web Development

LANGUAGE

- English
- Tamil

ABOUT ME

A passionate web developer specializing in the MERN stack, with experience in ERP portals and WooCommerce API development. Always eager to learn new technologies and create dynamic, user-friendly applications.

PROJECTS

1.Title : A PERSONALIZED STUDENT ERP PORTAL – Developed a MERN-based ERP portal to streamline student and admin operations. Implemented Internal Assessment Test (IAT) management for dynamic mark retrieval and a daily attendance upload system for efficient record-keeping. Designed a role-based access system and optimized the backend with modular APIs for scalability and maintainability.

2.Title : A MOVIE/SERIES WATCHLIST PLATFORM – Built a MERN-based Movie/Anime Watchlist platform enabling users to curate and manage their watchlists. Designed an intuitive UI for seamless browsing and added a feature to play movies on a dedicated page. Developed a profile page with editable user details and profile picture support, ensuring a personalized experience.

INTERNSHIP

- Interned as a Trainee, Gained hands-on experience in Linux system administration, networking, and security as part of an internship opportunity after completing the REDHAT certification. Worked on real-world scenarios, troubleshooting, and system automation.
- At Codingrim Solutions, I worked as a Web Development Intern, where I developed and optimized web applications to enhance user experience and performance.
- At Code Galatta, I completed a UI/UX internship, utilizing Figma to design intuitive interfaces, wireframes, and prototypes.

CERTIFICATIONS

- RedHat Certified System Administrator
- UI/UX Design using Figma
- Web Development(HTML, CSS, JavaScript)
